Ahmed Ahmed Youssef

Aspiring AI/ML Engineer

Mansoura, Egypt | 01275357621 | ahmedayoussef2029@gmail.com | linkedin.com/in/ahmed-fayed06

PROFESSIONAL SUMMARY

Computer and Control Systems Engineering student at Mansoura University (expected graduation 2029), developing toward an AI/ML Engineering career. Building a practical foundation in Python, data science, and machine learning through applied projects and the DEPI Data Science program, with growing exposure to deep learning fundamentals. Background strengthened by engineering coursework and hands-on robotics training.

SKILLS

Programming: Python, SQL, Object-Oriented Programming (OOP)

Computer Science: Data Structures, Algorithms

Data Science & Analysis: NumPy, Pandas, Matplotlib, Seaborn, Jupyter Notebook, Data Cleaning, Data Exploration, Exploratory Data Analysis (EDA), Data Visualization

Machine Learning: Scikit-learn, Supervised Learning, Classification, Regression, Data Preprocessing, Feature Analysis, Model Training, Model Evaluation

Deep Learning: Neural Networks, PyTorch, Deep Learning Fundamentals

Tools: Git

PROJECTS

Titanic Survival Prediction

- Cleaned and explored the Titanic dataset, performing EDA to identify key factors influencing passenger survival
- Applied data preprocessing and feature analysis to prepare data for classification modeling
- Trained and evaluated classification models using Scikit-learn to predict survival outcomes
- Technologies: Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn

House Price Prediction

- Built a regression pipeline to predict house prices from property features
- Performed data preprocessing and feature analysis to prepare the dataset for modeling
- Trained and evaluated regression models using Scikit-learn to assess prediction performance
- Technologies: Python, Pandas, NumPy, Scikit-learn

Handwritten Digit Classification — MNIST

- Developed a neural network using PyTorch to classify handwritten digits from the MNIST dataset
- Preprocessed and normalized image data before training the model
- Implemented a deep learning workflow including model training, validation, and evaluation
- Analyzed model performance using appropriate evaluation metrics and visualizations
- Technologies: Python, PyTorch, NumPy, Matplotlib, Jupyter Notebook

EDUCATION

Bachelor of Engineering, Computer and Control Systems Engineering *Expected 2029*

Mansoura University, Faculty of Engineering — Mansoura, Egypt

TRAINING & CERTIFICATIONS

Data Science Track — DEPI (Digital Egypt Pioneers Initiative) *In Progress, Expected Dec 2026*

Covering data analysis, data visualization, and machine learning fundamentals

Robotics Course — ST Smart *Completed Aug 2025*

Practical training in robotics fundamentals and applied engineering concepts

LANGUAGES

- Arabic — Native
- English — Professional Working Proficiency
